As a certified Workday Integrations Consultant and a recent graduate of the University of Illinois Chicago's Full Stack Web Development program, I bring a wide range of technical programming skills to the table. What really sets me apart is my experience in customer service. I know how to COMMUNICATE effectively between engineers, customers, supervisors, and more.

SKILLS

Workday HCM, Workday Integrations, Workday E2E (end-to-end) testing, HTML, CSS, JavaScript, React.js, Angular, Responsive Web Design, UI/UX Design, Frontend Security Best Practices, Debugging and Browser Developer Tools, SASS, LESS, Git, Webpack, Cross-Browser Compatibility, JIRA, CI/CD Pipelines, Linux, Systems Reliability, Automation, Scalable Systems, Service Architecture, Performance Optimization, Technical Troubleshooting, Documentation, Team Collaboration, Communication Skills

EXPERIENCE

Certified Workday Integrations Consultant | TopBloc | Chicago, IL | 2024

- Achieved certifications in Workday HCM, Workday Integrations, and Workday E2E (end-to-end) testing.
- Handled integrations (demographics, financials, benefits, and more) between a variety of companies, including many Fortune 500 organizations, and their new Workday HCM software.
- Served as lead and support on various projects, utilizing my coding and tech experience to build specific integrations while acting as a liaison for customers. I applied my extensive customer service experience to communicate complicated ideas step-by-step.

General Manager | School of Rock | Elmhurst, IL | 2014 - 2024

- Led a \$700k+ per year business with hundreds of regular students and dozens of employees.
- Increased customer retention by over 25%.
- Increased revenue by over 50%.
- Troubleshoot various network connectivity and tech problems.
- Spearheaded SEO and social media outreach.

PROJECTS

- **Collin & Tony's House of Sushi & Pizza** | <https://cthspp.netlify.app/>
Built this website as part of a two-man team, serving as a proof of concept for an interactive and engaging restaurant or retail business front-facing public site. The backend was built using JSON and pulled via Fetch API. The foundation of the site was built with HTML, styled using React Bootstrap, and enhanced with Framer Motion for reactive animation. Node.js was utilized for interactivity.
- **Choose A Movie Already!** | <https://chooseamoviealready.netlify.app/>
In a world of endless content, I created this website to randomly suggest a movie from various streaming services based on user specifications. You can filter movies by director, actor, decade, genre, runtime, and more. Built with React and using Bootstrap for CSS, I'm particularly proud of the filtering logic, which was developed with JavaScript.
